School Vaccination Programme 2013/14

HPV (Human Papillomavirus) vaccine

Tdap (Tetanus low dose diphtheria, pertussis) (Whooping Cough) Vaccine

MMR (measles, mumps, rubella) Vaccination Catch up.

The Health Service Executive (HSE) has asked the Department of Education and Skills to circulate to the Principals of recognised schools the attached letter to inform schools of the HSE school vaccination programme for the 2013/2014 school year.

The Minister for Education and Skills acknowledges the continued support by school management in preventing and responding to public health concerns.

Further information about the vaccinations contained in the school vaccination programme 2013/14 is available at www.immunisation.ie and the HSE dedicated website www.hpv.ie. The Department's website www.education.ie under National Emergencies/Public Health will provide a link to the HSE websites

TOM DEEGAN
PRINCIPAL OFFICER

SEPTEMBER, 2013.

August 2013

School Vaccination Programme 2013/2014

Dear Principal,

This letter is to inform you of the Health Service Executive (HSE) school vaccination programme in 2013/2014.

1. School vaccination programme

◆ HPV (Human Papillomavirus) vaccine

In September 2013 the routine HPV (Human Papillomavirus) vaccination programme will commence for all girls in 1st year. The final year of the catch up HPV programme will also take place for all girls in 6th year who have not already been vaccinated. (Girls in 6th year now who did not do Transition year were already offered HPV vaccine in the schools programme when they were in second year in 2010/2011).

All girls require three doses of HPV vaccine with a two month interval between the 1st and 2nd dose and a four month interval between the 2nd and 3rd doses. As in previous years the HSE vaccination teams will make arrangements to provide the vaccinations three times on agreed dates in September, November and March. It is important for girls to receive all three doses for the vaccine to be fully effective.

The target uptake of 80% for the three dose schedule was exceeded in 2011/2012 with a national uptake of 85% demonstrating the effectiveness of a school based programme.

◆ Tdap (Tetanus low dose diphtheria, pertussis) vaccine

The Tdap (Tetanus low dose diphtheria, pertussis) vaccine was introduced nationally in 2012/2013 and is recommended for all 1st year students. This programme will continue in 2013/2014.

Tdap vaccine may be given at the same time as one of the HPV doses for girls. The Tdap vaccine is of particular public health importance due to the large number of pertussis (whooping cough) cases.

2. MMR (measles, mumps, rubella) Vaccination Catch up Campaign

As part of Ireland's commitment to the World Health Organization's European measles elimination strategy and in response to large outbreaks of measles in Ireland and Europe the

HSE offered a dose of MMR vaccine to all students in second level schools in 2012/2013 as a one off campaign.

In 2013/2014 this campaign will be extended to primary schools and will also be offered to all 1st year students, who were in sixth class of primary school last year. MMR vaccine may be given with Tdap vaccine for boys and /or one of the doses of HPV vaccine for girls.

Information packs for these vaccination programmes are currently being prepared and will be distributed to schools in the coming weeks.

I would like to thank you for your cooperation in the delivery of the successful vaccination programmes in previous years. The HSE vaccination teams will continue to work with you to ensure vaccination sessions this year take place as efficiently as possible.

Should you or any parents require further information please visit www.immunisation.ie or www.hpv.ie or contact your local immunisation office (phone numbers overleaf)

Yours sincerely

Dr Kevin Kelleher
Assistant National Director of Health and Well-Being - Health Protection, Health Promotion & Child Health
Medical Registration Number 19719

Please note that for vaccination sessions to take place the HSE teams will require

- Use of a large room such as a hall/indoor sports court. In choosing this area it would be very useful if there was a separate entrance and exit
- Hand-washing facilities
- Tables and chairs for vaccinating teams (depending on size of school and vaccinating team)
- Chairs or mats for one class of students at any one time
- A liaison member of staff or a designated student to call students from class at the appropriate time for vaccination and return them to class in an orderly way after vaccination
